

# EXFO HOMELAND SECURITY

Instant insight into who, where and when

Today's security threats are mobile. EXFO's communication intelligence solutions are designed to quickly detect and help eliminate such threats. Our product portfolio includes portable units, with intuitive, easy-to-use GUIs, that give the user the speed and accuracy needed to conduct investigations on the move.

Given our extensive expertise in 2G, 3G and LTE network technologies, we're able to deliver solutions for:

- > Network signal analysis
- > Mobile interrogation
- > Direction finding
- > Mobile interception on the move

#### Our current product offer includes

**F10**

IMSI catcher with DF, area surveillance, mobile service blocking and interception capabilities in portable and vehicular forms

**C2**

Cell scanning and catcher detection in unnoticeable pocket size

**X6**

Quick field-deployable WCDMA networks

#### About EXFO

Listed on the NASDAQ and TSX stock exchanges, EXFO is among the leading providers of next-generation test and service assurance solutions for the global telecommunications industry.

Our Homeland Security division draws from a long history in protocol testing and simulation of wireless networks. We leverage this technological leadership through a dedicated team that focuses on developing tools for government authorities and law enforcement.
